

# *Ideal Re-upholstery moves to a more ideal location in Howell*

*by George Moses*

Ten years ago, Tammy Parisian and her brother, Rick Donald started Ideal Re-upholstery in Webberville in their basement. Tammy had previously worked for 11 years at Cars & Concepts in the cut and sew department when they built convertibles for Chrysler and Ford. And her brother had worked for an upholstery company since he got out of high school.

After Cars & Concepts closed, Tammy and Rick worked for another re-upholstery company for several years. And they've operated their Ideal Re-upholstery now for 10 years.

"We re-upholster any household furniture." claimed Parisian. We do some boats. We're doing window treatments now.

"The main thing is going to be the fabric outlet. We have lots of clearance fabrics and some trims. Home decorator fabrics for drapes, re-upholstery."

She explained that the difference between home decorator fabrics and the fabrics you'd buy at your local fabric store is they're heavier, thicker, wider and more able to withstand the everyday heavy use they undergo.

Ideal Re-upholstery is now emphasizing their interior decorating services, with bright and plentiful displays of fabrics, window treatments and artificial floral arrangements.

floral arrangements to compliment their other decorating services.

By the time you read this, their new sign will be finished and installed on the building. "We're going to open September 1st and we're having a grand opening on the 8th through the 10th. We're going to offer a lot of discounts, 15% off window treatments, 10% off labor on any re-upholstery, and we always have 40% off clearance fabrics."
